

# Precellys Emulsion Kit

## Get Perfect Emulsions

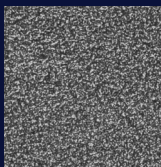

- **Easy:** add your Adjuvant and Antigen solutions to the tube and let the instrument mix them for you
- **Fast and Efficient:** reproducible high-quality emulsions in only 2 min on Precellys Evolution or Minilyc
- **Flexible:** prepare from 2 mL to 7mL of emulsion
- **Cost-effective:** no waste of expensive reagents
- **Safe:** no risk of accidental exposure or Repetitive Stress Injuries (RSI)

## An efficient method...

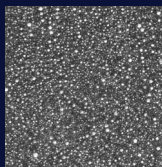

With the same volume of reagents (7 mL)

The diagram compares two methods for preparing emulsions. On the left, the 'Precellys Emulsion kit with Minilys' is shown to be completed in 2 minutes, resulting in 70 injections. A doctor is depicted with a clipboard, and the text below reads 'Confidence in reproducibility'. On the right, the 'Two Syringe Method' is shown to take 15-20 minutes, resulting in 50 injections. A doctor is depicted with a lightning bolt symbol above his head, and the text below reads 'Risk of Repetitive Stress Injuries (RSI)'. A central beaker icon is positioned between the two methods.

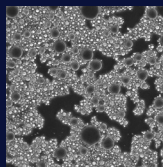

## ...to prepare homogeneous and stable emulsions
